

Krantz Filter Systems and Dampers participated in „ARABLAB 2014“ in Dubai

From March 17th to 20th the division Krantz Filter Systems and Dampers presented itself at „ARABLAB 2014“ in Dubai.

Designers, producers and users of laboratory and hospital equipment and services met at ARABLAB in Dubai. The exhibition was attended by all the key-players in the Middle East.

Together with the sales agent for this region, MOOV General Trading Ltd. and their partner HT Labor + Hospitaltechnik AG, Krantz presented its scope of delivery and supply in the range of filter and damper systems for bio-safety laboratories. Numerous visitors from all states in the Gulf region were interested in our products. Many interesting meetings were held which were related to actual projects partially.

In the course of the conference program, the Division Manager Mr. Claus Schweinheim, held three lectures with the following content:

- Sterilization of Filter Housings in BSL 3/4 Laboratories by Means of H₂O₂-Fumigation (Validation of Procedure, Periodic Examinations, Comparison with other decontamination media, Comparison of European trends)
- In-situ Efficiency Measurement for HEPA Filters in High Containment Laboratories (EN 1822 and ISO 14 466, Description of procedure, Expert report, Periodic examination of filters)
- Realization of Technical Systems for Bio-safety Laboratories Class 3 and 4 as Factory-Finished Container Solutions plus Preventive Maintenance and Periodic Examinations of HVAC Components (Standards, Factory-finished container solutions, Preventive maintenance, Periodic examinations of HVAC components)

There was huge interest in these lectures and many interesting contacts have been established afterwards.

Discussion at the booth

Claus Schweinheim during his presentation

Aachen, on March 25th., 2014
